

Decision Framework for XAI Method Selection

**HIGH-STAKES DECISION? → Multi-method triangulation
(SHAP + LIME + Perm. Imp., $\tau_{tri} \geq 0.80$)**

CERTIFICATION THRESHOLDS

- Fidelity: $\phi \geq 0.85$
- Stability: $\tau_R \geq 0.90$
- Triangulation: $\tau_{tri} \geq 0.80$

NON-CERTIFIABLE (standalone): LIME, LRP, GradCAM, Counterfactual
